Maximise your soil's performance with North Queensland's premium Dolomite.

Transform your soil with Miriwinni Lime & Gypsum's high-grade Dolomite. Locally sourced, Dolomite will supply essential plant nutrients (Calcium and Magnesium) to your soil profile and help raise soil pH.

As a versatile mineral resource, Dolomite plays a crucial role in benefiting agriculture and horticulture industries. Its Magnesium properties play a vital role in plant growth, while Calcium properties increase a plants metabolic function, aiding in nutrient uptake. These advantages not only boost plant growth, but also strengthen plants against pests, disease, and heat stress.

In addition to its growth and strength benefits, Dolomite can be used together with other fertilisers to enhance plant nutrient uptake.

As well as its use in the agriculture and horticulture industries, Dolomite is used in stockfeed and other industrial operations.

Miriwinni Lime & Gypsum's locally sourced Dolomite is available as a loose product, in bulk bags or in easy-to-handle 25kg bags. Additionally, MLG offer a full service for the supply and spreading of Dolomite, tailored to meet your specific requirements.

Benefits of Using Dolomite

- Enhances soil health and overall fertility
- Rich source of essential plant nutrients like Calcium and Magnesium
- Reinforces plant defences against pests, disease, and heat stress
- Activates plant metabolic functions, aiding in nutrient uptake and growth
- Elevates soil pH levels

So, if you're looking to increase plant growth and strengthen a plants defence, then look no further than MLG's premium Dolomite!

Dolomite

Dolomite

Typical Analysis and Properties

Element/Parameter	Composition
pH (1:5 Water)	9.2
Electrical Conductivity	124 μ S/cm
Neutralising Value	92%
Total Calcium (Ca)	20%
Total Magnesium	10%
Moisture Content	2.01%

Typical Sieve Analysis

Sieve Aperture	% Retained	% Passing
>2mm	0	100
1.00mm-2.00mm	0	100
0.85mm- 1.00mm	0	100
0.30mm-0.85mm	36.17	63.83
0.075mm- 0.30mm	42.02	21.80
<0.075mm (Dish)	21.80
