Optimise your soil's capacity with North Queensland's superior Agricultural Lime.

Are you looking for the highest quality Lime to enrich your soil, your stockfeed, your product or process? Miriwinni Lime & Gypsum's Agricultural Lime represents the pinnacle of quality and purity for powdered Calcium Carbonate.

Lime is a versatile mineral resource used in agriculture and horticulture industries and is frequently used to adjust soil pH levels and can be used together with other fertilisers to increase plant nutrient uptake. Overall, it serves as an excellent and value packed mineral, that can significantly improve soil health.

Beyond its soil health benefits, Lime proves to be a valuable additive in livestock feeding programs, supporting skeletal development in youngstock and milk production in lactating cattle.

Miriwinni Lime & Gypsum's locally sourced Agricultural Lime is available as a loose product, in bulk bags or in easy-to-handle 25kg bags. Additionally, MLG offer a full service for the supply and spreading of Lime, tailored to meet your requirements.

Benefits of Using Agricultural Lime

- Improves the pH of soil and water
- Enhances the nutrient availability and fertility of soil
- Boosts biological activity within the soil
- Serves as a Calcium supplement for animals and livestock
- Is a complementary additive in various manufacturing processes and road construction

So, if you're looking to improve soil health or livestock development, then look no further than MLG's premium Agricultural Lime!

Agricultural Lime

Typical Analysis and Properties

Element/Parameter	Composition
pH (1:5 Water)	9.15
Electrical Conductivity	85 μ S/cm
Purity (CaCO ₃)	100%
Total Calcium (Ca)	40%
Neutralising Value	100%
Total Silicon (Si)	0.06%
Moisture Content	0.57%

Typical Sieve Analysis

Sieve Aperture	% Retained	% Passing
>2mm	0	100
1.00mm-2.00mm	0	100
0.85mm- 1.00mm	0	100
0.30mm-0.85mm	35.29	64.71
0.075mm- 0.30mm	30	34.71
<0.075mm (Dish)	34.71
